Introduction

This syllabus is a record of the dancing which took place at the 13th annual New England Dance Legacy Weekend (known up until this year as the “Ralph Page Legacy Weekend”). If you are acquainted with traditional New England style dancing, my hope is that you can probably decipher most of the notation. If you have never seen such dancing, I recommend that you put down this syllabus and go find out about it firsthand. There is probably a dance near you!

There are numerous systems for notating dances. The one I have chosen to use, while perhaps not the most efficient, is hopefully among the more readable systems. Much of New England style dancing is phrased, so that figures correspond to the timing of a 32 measure (64 count) tune. Therefore, I usually present a dance in a way that shows clearly how it relates to the tune. Unless other timing is indicated, figures given on one line use 16 counts of time (one entire A- or B-part of music), and figures given on two lines use 8 counts each. Whenever the timing varies from this paradigm, it is provided in parentheses. For example:

A1- a 16-count figure
A2- an 8-count figure
and another 8-count figure
B1- a crooked figure (4)
that does not divide (8) evenly (4)
B2- Balance and swing

In the case of B2 above, I could have written, “Balance (4) and swing (12),” but did not do so because the timing is obvious from current dance convention.

Or consider the following:

A1- Allemande left corner, swing partner

Here the allemande can be 4 counts, 6 counts or 8 counts, as long as the allemande and swing together total 16 counts.

In some square dancing styles, the caller adjusts the figures depending on the skill of the dancers, the type of tune chosen, etc., and does not adhere to the “tyranny” of the musical phrase. That is why some dances (often squares), are simply presented as a sequence of figures. In general, however, New England style dancers want the same part of the figure to arrive with the same part of the tune each time through. My attempt in each case is to choose notation that suits the style of dance.

This year’s weekend included a large number of singing square dance calls. Consequently, I think you will agree, this syllabus is a particularly rich resource for those interested in singing squares. For most of these, I provide lyrics more or less as they are sung, and only include more specific directions about how a figure is done if it does not seem self-evident from the lyric. [Such directions are given in brackets.] Italics are used to indicate spoken words.

Another issue related to notation is vocabulary. Some callers prefer to refer to dancers as “men” and “women,” while others prefer the terms “ladies” and “gents.” I personally feel it is important to keep the use of such terms parallel. In other words, I become uneasy when a caller says “men and ladies” (or “women and gents,” for that matter). I generally stick with the slightly more old-fashioned terms “ladies” and “gents,” because they are easy for the dancer’s ear to distinguish in a noisy dance hall. In the syllabus I may revert to “women” and “men” in parenthetical directions such as who begins a hey. This is all purely a matter of style. I say, go ahead and call “girls and boys” or whatever you please, as long as the terms are equivalent. However, there is one place I ignore my own guidelines about language, and that is for the singing squares. Despite my high-falutin’ principles, for the purposes of this syllabus I am uncomfortable about altering song lyrics that are either traditional or come from a specific composer. This is because I feel a responsibility to you as a reader to present the dances as they happen within our tradition. That does not mean you cannot choose to alter the lyrics yourself to suit modern sensibilities should you decide to learn one of these dances. (I have often chosen that course myself when I call singing squares.)

I use “right and left four” to mean a 16-count figure, which might also be written as “right and left through, over and back.” The terms “neighbor” and “shadow” have become so universally accepted that I tend toward those for clarity, and apologize to those of you who miss “the one below,” “opposite,” and “corner” in those contexts where the newer terms have replaced them. I do retain “corner” for squares and in other contexts where it seems to better
suit the style. I have also not attempted to enforce uniformity for other terms (such as “actives,” versus “1’s”). Instead I again attempt to make the vocabulary suit the style of the dance. For example in a so-called “equal” dance, I would probably say “1’s” rather than “active couples,” if the 1’s are no more active than the 2’s.

If no fractional distances are given, assume “once” or “1×.” For example, if the call is “circle left,” it would be correct to circle all the way around. Otherwise I would write “circle left 3/4” to indicate a different amount. Sometimes the distance is not critical. For example, in “circle left, and back to the right” distance can vary a bit according to the energy of the dancers, as long as you end where you started. When a distance of exactly “once around” is essential to the choreography of the dance, I sometimes include that direction for emphasis. There is sometimes heated debate about fractions. If you think I should have written 11/4 somewhere instead of 11/2, you are probably right.

Many dances written and called by Don Armstrong this year contained a gent’s chain. Dancers executed this figure with quite a variety of styling. Don requested it to be done as follows: gents turn by the left hand to cross; then turn the opposite lady as in an allemande right. End with woman on man’s right-hand side. Note that when a ladies chain is followed by a circle, the man may pass the woman’s left hand from his own left hand into his right to make a smooth transition. Similarly, after a gent’s chain the woman can pass the man’s right hand from her own right hand to her left. Don discouraged using a courtesy turn with roles reversed.

The calls presented in this syllabus are the same ones actually danced during the weekend. If you notice that they occasionally vary from what an author intended, remember that we are dealing with a form of folk dance. I for one welcome such variations. Wherever possible, I have tried to credit the author of each dance or tune. Where no author’s name appears, I am guessing the tune or dance is “traditional,” or “anonymous.” I realize that there are probably some composers to whom I have not given proper credit. For this I apologize. Any such oversights are non-deliberate and a result of my ignorance. I can say only that your fine tunes and dances were greatly appreciated during the weekend, and if you contact me I will be certain to correctly ascribe your work to you in the future.

I am extremely grateful to all of the callers, musicians and organizers this weekend who responded to my pestering by being so considerate and helpful in providing the information I needed to create this syllabus in a timely way. Because they did not all use the same systems of notation, I have often adapted the material they gave me in an attempt to be more consistent. Any mistakes which may have crept into their work during this process are my responsibility and not theirs.

Many other people deserve thanks for the efforts they put into this excellent weekend. These include:
- **Sam Alexander**, a committee member who also coordinated work exchange.
- **David Bateman**, a committee member who also was the Friday evening MC.
- **Glenn Coppelman** who redesigned the brochure this year.
- **George Fogg**, a committee member who takes care of production details of this syllabus after I’m done with it.

- **David Millstone**, who put together the Saturday morning retrospective program and whose invaluable help in proofreading this syllabus was greatly appreciated by me.

Dear reader, I hope this syllabus is useful to you. I look forward to seeing you and dancing with you at a future New England Dance Legacy Weekend!

Intro: Honor to your partners, and to the corners all
Join your hands and circle left, circle round the hall
All the way around the ring, till you’re home again
When you’re there, swing your own, swing your partners all
Promenade around the ring, promenade that hall
Ho, Nelly. Hi, Nelly. Ho, Nelly Bly!

Figure: The first couple separate, go round the outside track
All the way around the ring, meet her coming back
Pass right by your partner, bow to the corners all
Turn around and swing your own, then promenade the hall
Ho Nelly. Hi, Nelly. Listen, love, to me!
I'll sing for you, play for you, a dulcem melody

Break Allemande left your corner, dos-a-dos your own
and Allemande left your corner again, grand old right and left
Ending: Grand old right and left go round, when you meet your own
Swing your partner round and round, promenade back home
Ho Nelly. Hi, Nelly. Listen, love, to me!
I'll sing for you, play for you, a dulcem melody

“Dulcem” is a word made up by Stephen Foster to fit the song. It is from the Latin, meaning “sweet.” Sequence:
Intro; figure for each couple in turn; break; figure for heads, figure for sides, figure for all couples at once; ending.
**Dip and Dive**

As called by: Ralph Sweet  
Formation: Singing square  
Song: *Redwing* by Kerry Mills – Note: play straight through once (AB), then AAB thereafter

Intro: Honor to your partner, and to your corners all  
and: Join up hands and circle left, you circle round that hall  
Ending: All the way around the ring, until you’re home again  
When you’re home, swing your own, swing your partners all  
Allemande left with the corner, do the grand old right and left  
Grand old right and left, meet your partner, promenade  
Promenade around you go, the breezes sighing  
While Redwing’s crying her heart away

Figure: First couple out to the right, and circle halfway round  
The inside arch and dip and dive, across the ring you go [couples 1, 2 and 4]  
Hurry hurry hurry let’s go, over and then below  
When you’re through go on to the next and circle halfway round  
Duck right through on to the last, circle halfway round  
Then dip and dive and away you go, the inside high and the outside low  
Hurry hurry hurry let’s go, over and then below  
Duck right through, home you go, and everybody swing  
Oh you all swing, swing your little Redwing  
You serenade her, then promenade her  
Promenade around you go, the breezes sighing  
While Redwing’s crying her heart away

Sequence: Intro; figure starting with each couple in turn; ending.

**Golden Slippers**

As called by: Ralph Sweet  
Formation: Singing square  
Song: *Oh Them Golden Slippers* by James A. Bland

Intro: Honor to your partner, honor to your corners all  
Join hands and circle left, circle round the hall  
It’s all the way around the ring, till you get back home again  
When you’re home you swing your own, swing your partners all  
Promenade around you go, oh them golden slippers  
The golden slippers I’m going to wear to walk the golden street
Figure: The first couple down the center, elbow swing with opposite two
    Separate, go round the ring, round the outside back to place
    Dos-a-dos your partners, swing with the corners all
    Take that corner lady, and promenade the hall
    Oh them golden slippers, oh them golden slippers
    The golden slippers I’m going to wear to walk the golden street

2nd time: Same gent with a brand new girl, go down the center with a butterfly whirl
    Lady go gee, the gent go haw, right back home where you were before
    Dos-a-dos your partners, swing with the corners all
    Take that corner lady, and promenade the hall
    Oh them golden slippers, oh them golden slippers
    The golden slippers I’m going to wear to walk the golden street

Break Allemande left with the corner, dos-a-dos around your own
And Allemande left with the corner again, then do the grand old right and left
Ending: Grand right and left around the ring, meet your honey, give her a swing
Swing your partner round and round, and promenade the hall
Oh them golden slippers, oh them golden slippers
The golden slippers I’m going to wear to walk the golden street

For the elbow swing, active couple steps between the opposite couple, hooks nearest elbow with opposite person, and turns once around. The second time patter does not change a thing about the figure, but is simply different patter: the elbow swing is the “butterfly whirl.” “Gee” and “haw” are how you’d tell oxen to turn right or left.
Sequence: Intro; figure twice for gent 1; figure twice for gent 2; break; figure twice for gent 3; figure twice for gent 4; ending. The ladies, although continually changing places, should still each get to be active twice.

A- Actives allemande right 1 1/2 (now you are improper)  
    Down the outside one place (4), lines-of-3 balance forward and back (4)

    Lines-of-3 balance forward and back (4), allemande R 3/4 (4) (now you are proper)
C- Right and left four with the couple above

Chris recommended a step-swing balance. In the walk-through he mentioned that Ralph Page had collected at least twelve versions of this dance! In this version the two allemande turns in the B-part are paced very differently: the first a leisurely 8 counts and the second a vigorous 4 counts.

**A Different Way Back** by Larry Jennings
Contra type:  Sawtooth formation. Starts as a duple improper (see note)
Reels:  *St. Joseph's/Galop et Chaine de Cotillon/Point au Pic*

A1 - Circle left until you can give right hand to neighbor on the side of the set
Start a grand right and left along your line (and around the horseshoe at the ends), counting current neighbor as #1 and continuing to #4

With neighbor #3, allemande right 1 1/2 to continue back toward where you began
B1 - With neighbor #2, left shoulder gypsy
Swing neighbor #1
B2 - Circle left 3/4
Swing partner, end looking for the new neighbor couple on the left diagonal

After the first time through, this dance is in what Larry calls “sawtooth” formation, halfway between a duple improper and a Becket formation dance, with couples orienting on the diagonal. The circle left in A1 is all the way around in the walk-through, because the set starts oriented as duple improper, but in fact it goes 7/8 of the way around after the first time through.

Larry has a unique style of dance notation, in which this dance would be written as follows:

A DIFFERENT WAY BACK by Larry Jennings  
L diag sawtooth forma. 
Based on Peter Bixby's THE FLIRTING WEAVER 
1. Cir L about once "till you get straight" (across from pt, up and dn from N) 
2. Gd R &L around the entire set, st R hd to N  3. Almd L fourth N x2  4. Almd R third N 1-1/2 
5. L-sh gypsy second N 1-1/2  6. Sw (orig) N  7. Cir L 3/4 (6); the W, releasing their L hd from N, go one additional step along the set, keeping tension in her R arm; the M then draw their pt into sw pos 
8. Sw pt, on R diag from current Ns, on L diag from next Ns  Ph 2-6: Neutrals must participate

The Dutch Skipper (circa 1760)
As called by: Don Armstrong
Formation: Contra, duple proper
Reels: Rose Tree/Spootiskerry

   Two-hand turn partner
A2- Couple 2 up the inside, cast out and down the outside to place

   First lady and second gentleman two-hand turn
B2- Set to partner twice
   Grand right and left within your foursome, starting with right hand to your partner, passing
   your partner, your same-sex neighbor, your partner again, and ending in progressed place

Almost the same dance is done in English country dance groups, where it is called Auretti’s Dutch Skipper. The only difference is that the first couple goes down the inside and up the outside at the beginning of the English version. Don emphasized that the actives should remain facing out at the end of B2, ready to go down the outside, which may be why he prefers this variant. He left it up to the dancers whether to pass one or two couples in the A-parts. In my set we passed two, but found we needed 12 counts to do so, which made the two-hand turn into a vigorous 4-count experience. Alternatively you could pass just one couple in 8 counts and turn in 8 more (as in the English country dance). Don used square dance terminology to describe the final figure (which English dancers would call “three changes of rights and lefts”) as a “slow square through.”

Connecticut Contra by Don Armstrong

B1- Parallel heys-for-3 along the set (Actives start by passing the one below by right shoulders)
B2- Couples 1 and 3 circle left
    Actives two-hand turn

The first figure in A1 could be described as “see-saw 1 1/2.” This dance is dedicated to Charles Cyril “Chip” Hendrickson, of Sandy Hook, Connecticut.

Plain Quadrille
As called by: Ralph Sweet
Formation: Square
Tunes: various marches

Ralph’s source for the Plain Quadrille was PROMPTING – How To Do It by John M. Schell, One of Boston's Leading Prompters, $1.00, Pub. 1890, Carl Fischer, Boston, NY, & Chicago. A “change” was a brief sequence of figures, and the quadrille consisted of five of these “changes” (later four were danced, then three). These sequences were danced rapidly, one after the other, and ending with a promenade off the floor. Dancers would not be taught or walked through the figures at a public dance, but were expected to learn them beforehand at dancing school or from another dancer. In dancing schools two-hand turns were used, but Ralph believes that in “real-world” dances these became swings, and other liberties were probably taken as well. Calls at these dances were minimal, and might have been delivered through a megaphone. Ralph taught us what we’d need to know first, and then we ran through the following four changes in rapid succession, to simulate the feel of the old dances.

First Change to the tune of Patience Quadrille

Intro: Wait (8 counts), honor partner and corner (8)

Heads right and left through, over and back (16)
Heads promenade inside the set, acknowledging each other couple in turn (16)
Head ladies chain, over and back (16)
Heads half promenade inside, half right and left home (16)

Repeat all of the above (except honors) for side couples (64)

All join hands, forward and back (8) and turn partner (8)
All promenade (16)
Second Change to the tune of *Come Haste to the Wedding* (6/8)

Introduction:  
A1-  Wait (8 counts) and salutations (8)  
A2-  Circle left all the way around  
B1-  Allemande left corner, grand right and left  
B2-  Swing partner, promenade home

Figure:  
A1-  Couple 1 to the right, join hands with couple 2 (4), balance (4), circle left (8)  
A2-  On to couple 3 and right and left four  
B1-  On to couple 4, ladies chain over and back (couples 2 and 3 chain also)  
B2-  All promenade  
(Repeat for each couple in turn. Then do the following ending.)

Ending:  
A1-  Circle left (8) and right (8)  
A2-  Dos-a-dos corner, dos-a-dos partner  
B1-  Allemande left corner, grand right and left  
B2-  Swing partner, promenade home

Third Change to the tune of *Caledonian #1*

Intro:  
Wait (8 counts), honor partner and corner (8)

Heads lead to the right, face side couple and balance (8)  
Chassé individually, gents to right behind partner, ladies to left in front of partner and turn to face partner (8). You are now in lines-of-4 facing up or down the hall  
Ladies chain across to the other line (8)  
Ladies chain within the line-of-4 (8)  
Repeat the chains, first across to the other line, and then within the line (16)  
Forward eight and back (8)  
Turn partner to home place (8) (Ralph recommended a two-hand turn rather than a swing here.)

Sides lead to the right, face head couple and balance (8)  
Chassé individually, gents to right behind partner, ladies to left in front of partner and turn to face partner (8). You are now in lines-of-4 facing across the hall  
Right and left through across to the other line (8)  
Right and left through within the line-of-4 (8)  
Repeat the rights and lefts, first across to the other line, and then within the line (16)  
Forward eight and back (8)  
Turn partner to home place (8) (Again, a two-hand turn rather than a swing is recommended.)  
All promenade (16)

Don has written a dance for each day of the week: *Monday's Dance, Tuesday's Dance*, this dance, *Thursday’s Child, T.G.I.F.* (which we danced in the next session – see p. 22), *Saturday’s Dance* and *Sunday Sampler*.

**Waltz:** Nerissa (Bob McQuillen)
Band Arrangements
Saturday, 2:00 P.M. music workshop led by the musicians of Swallowtail:
David Cantieni (flute), Ron Grosslein (fiddle), George Marshall (concertina),
Timm Triplett (piano) and Tim Van Egmond (hammered dulcimer)

Tunes that were played to practice different skills included Saint Anne’s Reel, Scollay’s Reel,
Petronella and Smash the Windows.

The following topics were discussed.

Common signals for communication.

- Start together with “four potatoes” or a short phrase played by one instrument. “Let ’er rip!”
- Lifting a leg means “switch tunes next time,” or if you are playing the last tune of a medley it
  means, “Going out!”
- Fingers are held up (usually by the caller, whose hands are free) to indicate how many more
  repetitions of the tune will occur. To be clear, signal during the B-parts of the tune – ideally
  the second B-part. A signal of “two” means two entire repetitions of the tune after the end of
  this B-part. Callers should try not to signal right at the transition to a new time through a
  tune, as the message is not clear. A "one" at that moment could mean that this new time is the
  last time through the tune, or that there is still one more time after it. It is best to signal early
  enough to give the band at least twice more through before the end of the dance. This gives
  the band time to arrange a fitting conclusion – for example a rousing climax for the final time
  through.

Orchestration

- We practiced alternating between fiddles carrying the melody, and everyone except the fiddles
  carrying the melody. First we tried changing the texture each time through the tune. Then we
  tried changing more frequently, for example at every eight bars.
- When you drop out or come in to change the texture, pay attention to doing so cleanly and
  just in time. End right at the end or begin right at the beginning in a way that integrates your
  sound into the dance beat.
- Dynamics can also add interest. Try sudden shifts, but also try a gradual build or fade.
- Tempos are important. Watch the dancers. All callers are not equally able to give the band
  appropriate tempos, and some are notoriously bad at this.

Fitting music to dances. Paying attention to balances.

- Scollay’s Reel is smooth and might not be the first choice in a dance with balances. Pays de
  Haut, on the other hand, seems to ask for balances.
- Ronde de Voyageur, with its smooth A-part in minor and percussive French Canadian B-part
  in major, is an example of a very useful tune for a dance with B-part balances.
- How you play can also exploit the balances in a dance. Fill the pick-up with energy as
  balances approach, and then play the appropriate phrase emphatically. In Petronella, add
contrast by playing the first two bars smoothly and the next two with bounce. Continue like this through the A-parts. Very smooth playing is also quite effective during the B-parts.

- Callers may request a specific tune. Ted Sannella, for example, used to write down tune names when he felt a dance-to-tune match was especially propitious. It is preferable for the caller to suggest “a tune like [whatever],” rather than requiring a particular tune. The wry comment was made that “the music sounds better if they know the tune.”

- It is easy to play jigs faster than reels, and caution should be exercised that they do not speed up too much. Occasional use of a jig-to-reel medley can offer a big boost to energy and enthusiasm. This higher energy doesn't come from speeding up the tempo when the band switches from jig to reel. In fact the basic tempo can and should remain exactly the same. The higher energy comes from the fact that there are more notes per measure in a reel than in a jig.

How Swallowtail Works Out Arrangements

The musicians from Swallowtail indicated that some ideas are worked out ahead of time in rehearsal, and some are spontaneous. They stressed the importance of musicians getting together to practice. Ideas will develop then. A question arose as to how spontaneous arrangement ideas are communicated over the general din. Some specific gestures were demonstrated that are used to indicate something like "I want to take the melody next time." Exactly what gesture one chooses is of little importance; musicians who rehearse and play together with some frequency will develop their particular codes. Being aware of what is going onaurally and visually is important while performing.

Other things discussed during the session included:

- effective ways to end medleys
- putting together tunes in a medley (thinking about compatible key changes)
- shaping a medley for variety and excitement
- pacing considerations for an entire evening

**Waltz:** Waltz of the Toys
Discussion with Don Armstrong

Don led a discussion of issues primarily of interest to dance callers. Rather than preach, he asked many questions, and asked participants for their perspective on the questions that were raised. He did share his opinions as well, saying at one point that he abides by the maxim: “Never ask a question you don’t have an answer for.” Following are some of the questions for callers and some of their answers as suggested by the discussion.

How do you repair a disaster?

Think before you act. It is often best to leave well enough alone. Attempts at repair can cause further damage. Admit mistakes graciously and non-defensively.

How do you get variety into a program of contras?

- Different formations. Some suggested varying formations themselves. Square dances done well can add interest to a program. A New England style quadrille is close in style to a contra dance and may be a good first step for dancers who enjoy mostly contras. Triples, circle dances and international dances were all suggested as possible ways to achieve variety.

- Different elements. Whether or not you vary the formation, vary the elements contained in a dance. For example, avoid a program where every dance has a hey.

- Different styles. Draw on dances from different periods of history, and try to convey something about the stylistic differences.

Which is more important – the music or the dance?

Clearly this is not the sort of question to which there is one correct answer, but all agreed that music is of vital importance. Don surprised many by suggesting that we consider the advantages of recorded music. Although our northeast tradition is to use live music, he believes that recorded music offers the following advantages. Music of excellent quality can be chosen, and the caller need never compromise by using indifferent music. Recorded music can be chosen that contains no major bloopers. The match between tune and dance can be exactly what the caller has in mind. And a greater variety of music can occur in the same evening, as the music is not limited by the stylistic strengths of any one band. Don also pointed out that recorded music might be particularly important for small groups, especially those with many new dancers. We all benefit if these groups grow, as they will if they are properly entertained. But smaller groups can often only afford “learning” or less experienced musicians, frequently only pick-up bands. Using recorded music instead lets the newer caller learn to choose the best music for each dance, and feel confident while doing so, because the music is predictable and in his or her control. More important is the fact that the dancers get the pleasure of dancing to good, solid, well chosen and well played music, rather than dancing to whatever the band can play, which may be mediocre at best.

There was also a good deal of discussion about how a caller can communicate with a band constructively.

What are some of the responsibilities of dance leaders?

In general, this group felt that it is a caller’s responsibility to expose dancers to a range of dances and styles, so that they have a sense of where New England dance has come from. There was also some discussion about not allowing the most vocal 10% of the dancers to control what happens for everybody, but rather to be sensitive to the needs of all dancers.

     Now the gent around two and the lady cut through

     Swing partner
B2-  Long lines forward and back

This dance was based partly on New Friendship Reel by Ted Sannella, and also incorporates advice from Tod Whittemore. Penn chose the title to indicate the collaborative nature of the dance’s authorship. The figure in A2 is borrowed from Appalachian square or big circle dancing. The lady goes up the outside one place, crosses the set, and then goes down the outside into the spot her partner started in. Meanwhile, the gent starts by crossing the set to follow her. He goes up the outside one place and steps back into the set, but at that moment he takes a shortcut down between couple 2 and arrives in his partner’s home. In this manner they swap places in eight counts. Then the whole business happens again with roles switched, the lady following the gent and taking the shortcut home.

A2-  A double figure-of-8: the active couple does a complete figure 8 down through couple 2’s position; meanwhile couple 2 casts up the outside to begin the same figure 8 (although starting at a different point on the path). The 2’s will arrive at the same spot as the 1’s 4 counts later at any point in the figure, so that traffic stays evenly distributed

**Waltz: My Bonnie Lad**
Music Workshop: Fiddle Styles
Sunday, 11 A.M. Workshop
led by Rodney Miller

Rodney’s workshop was filled with examples of fiddle techniques and regional styles. He talked about the change in kinds of music played at contra dances. The older New England dances relied on tunes like Devil’s Dream, Lamplighter’s and Cincinnati, or else French Canadian tunes like Ste. Anne’s Reel or Glise de Sherbrooke. Now Irish tunes and southern tunes are also common, and the dancing is faster, perhaps as a result of the spread of contra dancing to urban scenes and across the country.

Rodney thinks that there is a rhythmical cross bowing in New England style fiddle and that “drive” is built into the structure. Irish tunes are more melodic, often “snaky,” and may fit nicely with dances that have heys or figure eights.

Each fiddler develops a personal style. You can certainly learn from different regional styles, but you still are likely to come up with your own way of achieving certain effects.

Rodney made the interesting observation that often when we first fall in love with a tune, although we may not realize it, it is the *accompanyment* that makes it so attractive to us. Learning tunes for most of us requires much effort and commitment. There are wonderful sources for tunes, including other musicians, recordings and tune books. Usually, however, these offer you only the notes themselves, not “what comes in between the notes,” namely the sound quality, the ornaments, the style, and expressiveness (more about this below). Once you begin work on a tune, you probably need to revisit it often over time.

Rodney demonstrated many examples of fiddle technique. Obviously, much of the content of what follows may be difficult to visualize without his actual demonstration before you.

Relaxation is the key to Rodney’s technique. He says that he thinks about how to use the least amount of muscle necessary to get a good sound and be expressive.

Consider keeping the fiddle and bow on a shared geometric plane. Therefore, the angle of the fiddle is affected by which string you are on. In a similar way, the angle of your right hand relates to the angle of your elbow.

Experiment with the bow hold. You can achieve a variety of rhythmic effects by altering your grip, tapping with your fingers on the bow, etc.

Rodney used little ornaments called triplets or “cuts” to illustrate much about his technique. This ornament is common both in French Canadian and Irish music. Rodney called it a “muscle spasm” ornament. At its base a treble is simply the same note repeated three times very quickly by rapidly changing the direction of the bow. However, it is not simply three quick notes played straight, back and forth. Rather trebles involve a certain spring and bounce in the bow. This bounce adds lift and life to the music. The elastic quality of the bow stick and the tension of the hair will definitely affect this ornament. Again, relaxation is vital. Counterintuitive as it may be with the idea of a “muscle spasm,” you must relax into the trebles, and by doing so you can produce one after another quite smoothly.

There are several other interesting techniques in what Rodney calls his “bag of tricks”:

- Straight “shuffle” rhythm with little ornamentation is a style older New England dances often relied on.
- “Grit.” Use scraping sounds, string noises, etc. as punctuation and rhythm. Combines well with lots of single, unconnected bow strokes.
“Echo bowing.” Keep a constant beat with short single bows and a strong accent on beats 1 and 3, so that beats 2 and 4 feel like an echo. This can make for a very strong and clean sound. Rodney illustrated it well in the tune he taught at the end of the workshop.

“Shading” or bending notes up or down. This can be extremely expressive in the right context. Don’t overuse it though or it will sound like an affectation.

Some French Canadian fiddlers have a style in which they bear down quite hard and use a fair amount of vibrato. Rodney played Reel Béatrice this way and the effect was dramatic.

There is a Cajun or Southern technique involving the use of many double stops and drones. Open strings are useful for this and Rodney recommends trying it out first in the key of A. This style often employs alternative tunings as well.

A variety of percussive left hand ornaments. You can throw your finger down onto the fingerboard, or pluck it off. Grace notes can add much character to a tune. The farther a grace note is separated from the note it is ornamenting, the brighter it will sound.

Combining ornaments (Rodney’s own favorite technique). For example using grace notes in the left hand as you perform “muscle spasm” bowing.

Rodney encouraged us to try these techniques, but avoid clutter. He emphasized the idea of accenting the important notes in a tune, in order to make the tune sing and be exciting for dance. Look for contrasts in tunes and present them in a way that appears to tell a story.

At the end of the workshop, Rodney taught us the following tune, Belledune’s Quickstep, which he compared to the Chinese Breakdown. It has a smooth A-part, and an arpeggiated B-part that works well with highly rhythmic bowing. Rodney used “echo bowing” for the series of quarter notes in the A-part, and shuffle bowing to maintain a driving rhythm through the dotted half notes.

Rodney closed the session with a J. Scott Skinner tune, Madame Neruda, that employed what he called “ricochet bowing,” quite the tour de force!
Open Microphone Session
Sunday, 11 A.M. program – David Bateman, MC with music by Swallowtail

Polka: Spanish Lady

Grand Slam Chain
As called by: John Trafton (“J.T.”)
Formation: Square
Reel: Miller’s Reel

Part I: Heads right and left through, over and back
Sides right and left through, over and back
Heads, right and left through, sides right and left through
Heads, right and left home, sides right and left home

Part II: Head ladies chain, over and back
Side ladies chain, over and back
Head ladies chain over, side ladies chain over
Head ladies chain home, side ladies chain home

Part III: Head ladies chain over, side ladies chain over
Heads right and left through, sides right and left through
Head ladies chain over, side ladies chain over
Heads right and left through, sides right and left through

Sequence: Improvised intro; part I; improvised break; part II; improvised break; part III; improvised ending. Beside allemande left corner and grand right and left, J.T. used an “allemande thar” for his breaks. Here’s how you do it:

Allemande left corner, begin a grand right and left pulling past partner by the right, giving left to next and turning just enough for the gents to join right hands in the center to form a star. Left hands are still joined with the appropriate lady. The gents walk backwards and the ladies forward to turn the star.
Now allemande left halfway with whoever is in your left hand. A right and a left and form that star again with the gents backing up. You are now all holding your corner’s left hand.
From here you can allemande left halfway and a grand right and left, or simply “shoot that star” by pulling past your corner into your partner’s arms for a swing. (Promenade home.)
**Three Ladies Chain**

As called by: John Trafton ("J.T.")
Formation: Square
Music: Bill Cheatum

Couple 1 out to the right and circle left with couple 2
Three ladies chain: Couple 1 is in the center lined up with couples 2 and 4. Ladies 1 and 2 chain, but gent 1 does only a half courtesy turn with lady 2 and sends her off to chain with lady 4. He turns lady 4 halfway as well. Continue this process until all three ladies are home.
Couple 1 on to couple 3 and circle left
Those two couples do a figure improvised by the caller (J.T. used circles, stars, rights and lefts and chains with different couples)
Couple 1 on to couple 4, circle left
Three ladies chain

Repeat for each couple in turn, with improvised breaks.

**MN-NY Happy Returns** by Carol Ormand (1994)

B2- Gypsy partner and swing

In B1 your partner is in a different hey from you. Composed for the wedding and subsequent move of Peter Stix and Amy Jesaitis. The move from Minnesota to New York State is commemorated by the initials in the title, which are pronounced “many.”

B1- Actives down the center, turn alone
   Return, cast off
B2- Circle 6 to the left halfway round
   Actives swing in the center, end proper

This crowd knew to cheer wildly when the number of the Ted’s Triplet was announced.

B2- Couple 1 promenade inside the set, acknowledging each other couple in turn  
A3- Couples 1 and 3 change places, 3’s arch and 1’s dive and turn as couples to face in  
A4- Change back again, this time couple 1 arches and couple 3 dives  
B3 and B4- Repeat A3 and A4  
A5- All join hands and polka to the left  
A6- Promenade home

Repeat the sequence for each couple in turn.
**Walpole Cottage** by Pat Shaw (1963)
As called by: Marcie Van Cleave
Formation: 3-facing-3 around the room
Tune: *Walpole Cottage* (Pat Shaw)

In each line-of-3, call the center person a “middle” and the other two “ends.”

4-measure intro-

A (16 measures)- Forward six and back (8)
Two middles allemande right almost 3/4, turn first contra corner by the left (8)
Same middles, allemande right opposite again, turn second contra corner by the left (8)
Allemande right, and left with left-hand person from your own line (8)
Allemande right, and left with right-hand person from your own line (8)

B (16 measures)- Middles fall back to place as ends star right (8)
Left-hand star back (8)
Right-hand ends cast to the right as the middles turn right and all do a hey-for-3 (middles and right-hand ends start by passing right shoulders) (16)

C (16 measures)- Forward six and back (8)
Circle six halfway round (8)
Forward six and back (8)
Swing in baskets of 3, open up to face original direction (8)

Threesomes can choose to open up the baskets at the end of the C-part in any order they wish, thereby rotating who is a “middle” and who are “ends.” Intro repeats every time through the dance (and, indeed, closes the dance).
**Partner’s Delight** by Judy Ogden
As called by: Angel Roman
Formation: Contra, duple proper
Reels: *Trip to Moscow/Reel Béatrice*

A1- Circle left 1 1/4 until gents are facing down and ladies up
    Gents arch, ladies duck through, ladies let go of each other to separate around one and pull the gents under their own arch, ending in a line-of-4 facing down the hall
A2- Down the hall with the gents in the center of a line-of-4, wheel as couples, gents backing up and ladies walking forward to turn the couples
    Return with the ladies in the center of a line-of-4
B1- Balance and swing partners on the side of the set
B2- Ladies chain
    Couple 1 half figure eight through the couple above

The circle left in A1 takes a bit more than 8 counts, so the remaining part of the figure (“rip and snort and form a line,” as in *Geezy Peezy* on page 12) needs to be compressed somewhat.

**Waltz:** *Josefin’s* (Roger Tallroth)

Eric’s Beckett by Marianne Taylor (1993)
As called by: Marianne Taylor
Formation: Contra, Becket formation
Jigs: Maggie Brown’s Favorite/Irishman’s Heart to the Ladies

A1- Circle left
And back to right
A2- Holding inside hands with partner, balance right and left to other couple, then drop hands and turn individually around to the right (as in Petronella). Woman leads, man follows and couples face each other again up and down the set.
Repeat, ending in other couple’s place on the side
B1- Ladies chain over and back
B2- Promenade across
Right-hand star, gents lead partner along the line to the next couple

Written for the wedding of Eric Eggleston and Terry Beckett. The figure in A2, “Petronella in tandem,” was devised by John Drewry for Scottish country dancing. It differs from other so-called “Petronella” turns done in a circle-of-4 only in that hands are not held with neighbors, but this gives the figure a different feel. Terry’s last name is Beckett with a double “t,” while the dance formation is named for Becket, Massachusetts and has only one “t.”
**Legacy Reel** by Tony Parkes (1989)
As called by: Tony Parkes
Formation: Contra, duple improper
Music: *Sheehan’s Reel/Big John McNeil*

A1- Down the hall with the actives in the center of a line-of-4, turn alone
Return, bend the line
A2- Circle left
Allemande right neighbor 1 1/2

**Poetry in Motion** by Lisa Greenleaf
As called by: Linda Leslie
Formation: Contra, duple improper
Music: *Swallowtail Reel/Old French*

A1- Right-hand star
Allemande right neighbor 1 1/2
A2- Left shoulder gypsy next neighbor
Swing first neighbor
B1- “Give and take” and swing partner on gent’s side of the set
B2- Ladies chain
Left-hand star

The “Give and Take” figure in B1 was invented by Larry Jennings for his dance of the same name. End the swing in A2 facing across in “half shoulder-waist position” (man’s right arm around woman’s waist, her left hand on his right shoulder). Go forward and take your partner’s free hand in yours. Then the man draws the woman back to his side. (It feels most connected if she resists slightly.) Larry prefers to do this figure in 4 counts and have 12 counts for the swing, although Linda did not teach this timing explicitly and most took 4 small steps forward and 4 more to come back to the gent’s line.
Big Circle Dance
As called by: Dudley Laufman
Formation: Big circle of couples, sometimes all in one circle, sometimes progressive with every other couple moving on to the next
Reels: Flop-eared Mule/Fisher’s Hornpipe

Gents the same
Dos-a-dos partner and swing
Repeat all of the above

Circle up four, first to the left, then back to the right
Swing opposite, swing partner
On to the next

For each couple in turn progressed to, Dudley called a different figure for four people. After each figure couples move on to the next. He used the following figures:
  Duck for the oyster, dig for the clam
  Cage the bird; bird hop out and crow fly in
  Turn opposite by right elbow, partner left elbow, repeat
  Allemande right opposite, partner left, repeat
  Circles
  Stars
  Dos-a-dos opposite and partner

To close, go back to a big circle and circle left
Back to the right
Face partner, grand right and left ALL the way around
Swing partner
All ladies to the center, turn to face out and stay there as the gents walk ALL the way around the outside to the right
Swing partner

**Calvin Crest Contra** by Don Armstrong  
As called by: Don Armstrong  
Formation: Contra, duple improper  
Music: *Far From Home/Liberty*

(See page 39 for dance instructions.)

Throughout the weekend, Don made wisecracks about throwing tomatoes when either he or the dancers made little mistakes. While he walked through this dance, one dancer presented Don with a tomato borrowed from the lunch table earlier. Don placed it cautiously on the stage within easy reach, but fortunately did not find a need to use it.
